🌟 Executive Summary

Results-driven **Engineering Manager** with **10 years** of full-stack development experience, known for building and scaling efficient, high-performing teams. Expert in guiding major architectural changes and ensuring superior code quality through Agile practices. Champion of team empowerment, dedicated to **growth**, **diversity**, and **balance**.

🎓 Education

- CSE from JNTUA University (Topper and Gold Medalist) [2012-2016]
- PG Diploma in Data Science from Carnegie Mellon University (CMU)

💻 Key Projects

AI-First EdTech Platform (Personal/Side Project)

- **Role:** Architect & Lead Developer (IC)
- Developed a modern AI-first platform featuring a student-facing **chatbot** for query resolution and a performance summary generation tool.
- **Technologies Used:** Leveraged **Google Notebook LM, AI Studio, Gen AI, Gemini, and RAG (Retrieval Augmented Generation)** for the core AI functionality.

🛠️ Core Skills & Expertise

- **Leadership & Strategy :** Engineering Management • Team Leadership • Technical Hiring • Technical Presentations • Interpersonal Communication
- **Architecture & Full-Stack :** Software Architecture • Fullstack Development • Microservices • SaaS • Cross & Non-Functional Requirements
- **AI/ML & Data Science** : Prompt Engineering • AI Studio (GenAI) • Chatbots (Development & Strategy) • Data Science Strategy
- **Process & Cloud :** Agile Methodologies • Code Review • Amazon Web Services (AWS)

💼 Professional Experience

Engineering Manager | Modern Spaaces [*Feb 2025 – Present]*

- **System Architecture & Design:** Responsible for the complete system design and long-term strategy planning for the construction workflow platform.
- **Full-Stack Tooling:** Built a comprehensive CRM dashboard and relevant internal tools used by cross-functional stakeholders to streamline operations.
- **Delivery Ownership:** Directly oversaw the delivery of high-traffic Microsites and core mobile applications.
- **Efficiency Initiative:** Architected and implemented "Tech-pods" (specialized services/teams) to dramatically improve engineering efficiency and delivery speed.
- *Actively aided Technical Hiring.*

Co-Founder | Karyah [*Nov 2023 – Feb 2025]*

- **MVP Design & Development:** Designed and independently developed the Minimum Viable Product (MVP) for a new Prop-Tech SAAS suite.

- **Client Delivery:** Built branding websites for two external clients, managing the full delivery lifecycle from design to deployment.

Associate Engineering Manager | Tata 1mg [*Apr 2023 – Nov 2023]*

- **Data Pipeline IC Role:** Engineered and implemented solutions for the seamless, transactional data flow into SAP and other BI tools, ensuring data integrity across financial systems.
- **Financial Data Management:** Led the technical initiative to build a consolidated Financial Data Management System.
- **Reconciliation Automation:** Developed systems for automated reconciliation of vendor payments, significantly reducing manual effort and errors.
- *Actively aided Technical Hiring.*

Technical Lead | HealthPlix [*Aug 2021 – Apr 2023]*

- **Core Product Architecture:** Successfully initiated, designed, and executed a core product revamp using cutting-edge architecture (**Micro FrontEnds** and **Microservices**).
- **AI/ML Feature Development:** Delivered critical new features like **OCR**, **ML-based smart suggestions** for diagnosis and medicine prescription, substantially reducing consultation time.
- **Growth Initiative:** Designed, executed, and delivered a multi-platform desktop application and a doctor referral program, which increased user throughput and boosted lead generation.
- **Technical Deep Dives:** Performed detailed code reviews to enforce **Go, Python, TypeScript, ORMs, and Micro-Front-End** best practices, directly improving team code quality.
- *Actively aided Technical Hiring.*

Senior Software Engineer | HashedIn by Deloitte [*May 2019 – May 2021]*

- **Client Migration (IC):** Successfully **migrated a major product code** (Safety Suite) from **React 15 to React 16** for a key client (Honeywell) while onsite.
- **Full-Stack Development:** Built a multi-tenant web application (Python, FastAPI, React.js, TypeScript.js) and a mobile application (React Native, NodeJs, PostgreSQL) for major clients.
- **Plugin Development:** Provided a specific plugin in **.NetCore** for a client application.

Earlier Experience (Dec 2016 – May 2019)

- **Senior Software Engineer** | Justdial (*May 2021 – Aug 2021*): Developed Proof-of-Concepts (POCs) in Next.js, Leaflet.js, and MongoDB for the Hotels vertical.
- **Software Engineer** | Inspirisys Solutions (*Dec 2018 – Feb 2019*): **Independently built a chatbot management dashboard** (React.js, NodeJs, Python, GraphQL) and improved dialog flow.
- **Application Developer** | Divum Corporate Services Pvt Ltd (*Jun 2018 – Oct 2018*): Lead a small team on building a backend service (Flask/Python) for a multi-tenant SAAS product; contributed to an open-source library.
- **Full Stack Developer** | GoBumpr-myTVS (*Dec 2016 – May 2018*): Independently developed the company's first internal CRM using **Core PHP7, JavaScript, and MySQLi**, saving the support team **60% of time**. Developed **RESTFul APIs in GoLang** for the Axle App.

🏅 Certifications

- Prompt to Prototype - [AI] - Google
- AWS ML Technical Training & Certification - Amazon Web Services (AWS)
- AWS Technical Professional - Amazon Web Services (AWS)
- Certified Data Scientist - Carnegie Mellon University
- Udemy certified GoLang Developer - Udemy
- Udemy certified gRPC [Golang] developer - Udemy
